#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

## DETAILED ACTION

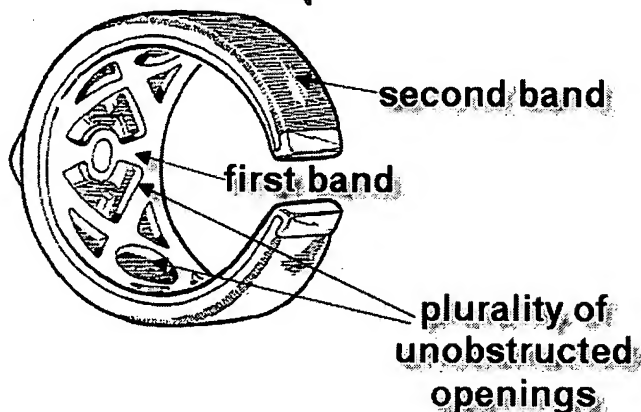

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 2, 8 and 13-18 have been rejected under 35 U.S.C. 102(b) as being anticipated by Bulgari, D293898. See annotations to figure 3 of Bulgari.

Regarding claims 8 and 16, the method of making the ring is not germane to the finished article. The method limitation is given weight by viewing the final product made by the method and any structural attributes associated with the specific methods of making the product. In this case the casting of the rings from wax by the lost wax process does not impart any structural attributes different from Bulgari's rings. Therefore, Bulgari's device meets the claimed method limitation.

### *Claim Rejections - 35 USC § 103*

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 3-6 have been rejected under 35 U.S.C. 103(a) as being unpatentable over Bulgari.

Regarding claims 3-5, Bulgari discloses a second outer solid band and an inner band with apertures located within the second outer band. The claims require that the solid band is the inner band, which is a mere reversal of Bulgari's inner and outer bands. It would have been an obvious design choice to reverse Bulgari's bands so that the outer band has apertures and the inner band is solid. This reversal of the bands improves the aesthetical appearance of the ring. Also, please note that the courts have found that matters relating to ornamentation only, which have no mechanical function, cannot be relied upon to patentably distinguish the claimed invention from the prior art. *In re Seid*, 161 F.2d 229, 73 USPQ 431 (CCPA 1947).

Regarding claim 6, Bulgari fails to teach the inner ring being made from a different material than the outer ring. The examiner takes official notice of the fact that rings and jewelry are commonly made from two or more types of precious metals in order to improve their aesthetical qualities. It would have been an obvious design choice to make the inner ring from a precious metal different from the outer ring in order to improve the aesthetical appearance of the ring. Also, please note that the courts have found that matters relating to ornamentation only, which have no mechanical

function, cannot be relied upon to patentably distinguish the claimed invention from the prior art. *In re Seid*, 161 F.2d 229, 73 USPQ 431 (CCPA 1947).

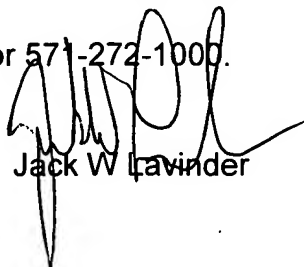

### ***Response to Arguments***

5. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.
